

Released Sep 2024.

Changes

- All forms, schedules and declarations updated to the latest ATO SBR Specifications:-
 - Individual Income Tax Return (IITR) 2024 Package V1.3.
 - Non-Individual Income Tax Return (NITR) 2024 Package V1.6.
- Added a Warning for when the Medicare levy surcharge may be applied when the income is over the threshold for the individual. This has been applied to the 2024 Income Tax Returns (IITR).

Minor Defects

- We have updated the process that locks the figures in a tax return once lodgment is successful. We are aware that, in some cases, the figures may have changed after lodgment. This release includes fixes to address those reported issues.
- Fixed the formatting issue in the PDF where a comma incorrectly appeared in the postcode.
- Corrected the alignment of fields in the depreciation worksheet printouts for the 2023 and 2024 returns.
- Resolved the issue where line 2 of the address disappeared on screen and in the PDF export when selecting the option 'Has your postal address changed?'.
- Updated the SAPTO warning to generate correctly.
- Fixed a calculation issue in the Self-managed superannuation return for Item 11, label W, ensuring the field displays correctly in all situations.

Security

- Continuous security updates
