

Released August 2024.

Changes

- ITR Prefill 2024 enhanced with an option to choose to prefill unfinalised data. Two locations have had this enhancement include -:
 - When creating a new form and choosing to prefill the new form.
 - Within the tax form under the Prefill bucket icon
- The latest ATO packages have been applied which include updates to certain validation rules that enable the Small Business Energy Incentives fields.
- Updated 2024 Depreciation Asset write off threshold
- Changed the wording for ITR item M2 to include leap year value

Minor Fixes

- Resolved the issue with the 2024 Foreign property worksheet with expenses was preventing the ITR to be opened.
- Updated the Trust Return to display correct error message at the Business and Professional items section.
- Resolved the issue with the 2021 FBT form displaying an error that couldn't be resolved.
- Reviewed the issue where the capitals gain in the Trust income worksheet was not transferring correctly to the main form.
- Resolved issues where the exported PDF values did not match the form values for certain items.
- Updated the mapping for Franking credit in the Trust income schedule for the Company Tax Return

Security

- Continuous security updates
