

Released June 2024.

## Changes

- Improvements to the infrastructure have been applied improve performance of Access Tax.

## Minor Fixes

- Updated the Client Record when an email is saved but without a 'Contact Name' being included. When Access Tax is integrated with other Access products this may have the effect of adding an unrelated contact name into the Contact Field. This has been resolved.
- Adjustments to how the new year tax return creation process is conducted have been applied. This minor update fixes the likelihood of the error 'Form type not available for the given period.' from triggering under a specific scenario.
