

Access UBS Accounting, Inventory & Billing December 2024 Release Notes

Release Documentation

Version 2024.4

Welcome to the latest version of our Access UBS Accounting, Inventory & Billing Release Notes!

This document serves as your comprehensive guide to the new updates and enhancements in Version 2024.4. You will find a detailed summary of the changes, along with easy-to-navigate links for in-depth information on new features.

For a comprehensive overview of all the content included in this document, please refer to the Table of Contents. This will guide you to detailed sections on new features, enhancements, and additional resources to help you make the most of the latest version.

Overview of Access UBS Accounting, Inventory & Billing

Access UBS Accounting & Billing is a comprehensive financial management software designed for small and medium-sized enterprises (SMEs) in Malaysia. It streamlines various tasks, including customer and supplier payments, sales orders, purchase orders, goods receipt notes, and delivery notes. With a user-friendly interface, effortless compliance features, and support for SST (Sales and Service Tax) filings, UBS Accounting & Billing helps businesses efficiently manage their finances and promote growth.

Access UBS Inventory & Billing is a system designed for efficient inventory management in businesses. It provides features such as instant stock updates, precise tracking of inventory movement (including shipments and deliveries), an order entry module, multi-currency support, and comprehensive tracking. Access UBS Inventory & Billing streamlines inventory processes, enhances accuracy, and supports efficient business operations.

Release Summary

Access UBS Accounting, Inventory & Billing v2024.4

Important Note:

- **Disable Antivirus Software:** Before installing the new update, temporarily disable your antivirus program. Some antivirus software may interfere with the installation process.
- **Restart Required:** After completing the update installation (whether via Online Update or using the Installer), restart your computer to apply the configuration changes.
- **Update License Activation:** If you are using an older version of UBS AIB (prior to v2022.4), download and run the Service Component Patcher to ensure your license activates correctly.
- **Service Component Patcher:** If you are already on Access UBS v2024.2 and did not get the OU notification, please go to the Download Page to download and run the patch file named Online Update Patcher. When you reopen the application, the OU notification will be prompted.

This release includes the following major features. To explore more details about each feature, please select the relevant links. The features are organized by Product/Area to help you easily locate the information you need.

Malaysia eInvoicing

Enhancing the Permit No. field in Modern view to support up to 50 characters.
